Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 18-33 and 34-41, drawn to peptides, methods of inhibiting viral infection using the peptides and methods of provoking an antibody response with the peptides, classified in class 424, subclass 184.1+.
 - II. Claims 11-17, drawn to isolated nucleic acids, classified in class 536, subclass 23.1.
 - III. Claims 42 and 43, drawn to antibodies, classified in class 424, subclass 130.1.
 - IV. Claims 44-74, drawn to methods of identifying inhibitors of viral infection, classified in class 435, subclass 5.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the polypeptides can be made synthetically.
3. Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product

Art Unit: 1643

as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the peptides can be used to provoke an immune response, or in the purification of antibodies specific for those peptides.

4. Inventions I and III are not related in sequence or structure of the polypeptide, but appear to be related in so much as the antibodies of group III would appear to bind the peptides of group I. However, they also can be used in the methods of group IV, and in the chromatographic purification of RhoA binding polypeptides.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
